

## Desmond Connors Presentation

What a fabulous start to the New Year we've had in DPS. Many thanks to Des Connors for coming to the club at short notice this week. I think it is fair to say that Des gave a very enjoyable, entertaining and funny talk on his work last week and was much appreciated by all those in attendance at the club. His dedication to spending 9 years to document fully the life cycle of the King Fisher bird was nothing short of astounding. His images were truly inspiring for all nature lovers and nature photographers.

Des Connors being presented by Denis Whelehan with a copy of FIAP Nature Biennial World Cup book in which Des' images featured prominently.
