

## Photoshop Night

We will try to have more practical nights before the end of the season. Tonight, we kicked off with a Photoshop Q & A session. Many of our members have queries that can be easily demonstrated by other members more experienced in Photoshop. Members were able to bring whatever version of Photoshop they had on laptops. Damien gave a detailed account of effective use of Camera Raw. As a number of members sought help on the topic of hair selections, Simon presented an on-line Phlearn tutorial via the projector. <http://www.phlearn.com> and <http://www.youtube.com> carry a significant number of free tutorials of high quality that may be of interest to members.
