

Photoshop Night

We had a great night with one of the best photographers and artists in the club, Gabriel O'Shaughnessy, demonstrating his Photoshop skills. It was fantastic to see Gabriel's images on our new Epson projector. I, for one, from the back of the room, could clearly see subtle colour and contrasts rendered. Gabriel stepped through three of his successful images and demonstrated each of the steps taken in Photoshop. Many questions were posed and answered from the club members and everyone was able to gain some insights and technical know how from the evening.
